

## GINGER NATIVE WATER

INCI: *ZINGIBER OFFICINALE* ROOT EXTRACT

Imagine an ingredient extracted directly from plant water without the use of any solvent.

→ Using hyperfrequency, Antofenol extracts the water from ginger root to provide a new range of innovative ingredients in cosmetics.

### COSMETICS CLAIMS BASED ON LITERATURE REVIEW

Ginger is a medicinal plant that has been used for thousands of years.

One of its main cosmetic benefits is its anti-inflammatory effect, which helps to reduce the appearance of acne, eczema, and other inflammatory skin conditions.

Ginger can also help to soothe irritated skin and reduce redness. Its powerful anti-oxidant properties help to prevent free radical damage, which damages skin cells and accelerates the appearance of premature aging, such as wrinkles and age spots.

Ginger is also an excellent natural exfoliant. Regular use of skincare products containing ginger can help to remove dead skin cells, improve skin texture, and reduce the appearance of enlarged pores.

## GINGER NATIVE WATER

INCI: ZINGIBER OFFICINALE ROOT EXTRACT

### REGULATION

INCI .....	<i>Zingiber Officinale</i> root extract
Origin .....	China, organic
Preservation .....	Preservative free
Certification .....	Cosmos certification on demand
Natural index origin (ISO 16128) .....	100.0 %

### TECHNICAL

Appearance .....	Limpid yellow liquid
Solubility .....	Water soluble
Recommended dosage .....	1.0 % - 10.0 %

### APPLICATIONS

→ Based on litterature review: soothing activity, antioxidant, improve skin texture
